Newsletter #1 | July, 2024

Dear partners and supporters of the Inclusive Apprenticeships project

We are delighted to share the latest updates and progress in our project dedicated to promoting inclusive apprenticeships. Our project continues to evolve, and your involvement and contributions are essential to its success.

Recent project progress

We have made significant strides in developing the training program for company mentors who work with apprentices from disadvantaged backgrounds. The most recent and important document produced so far is the Concept Design.

The document serves as the foundation for creating a self-paced distance learning course structured into thematic modules. This course will be delivered through a multilingual, interactive e-learning platform. It is anticipated that 120 company mentors from Romania, Bulgaria, and Austria will be trained via this platform to support apprentices from disadvantaged backgrounds.

The Concept Design document is a comprehensive guide for developing the training program content for apprentices. It includes:

- **Introduction and Training Framework:** Presentation of learning objectives and expected outcomes, as well as the structure and scope of the program.
- **Module Structure and Objectives:** Detailed description of the modules, including topics covered, learning objectives, expected outcomes, and time required to complete each module.
- **Co-Creation Guidelines:** Instructions for partners involved in content development, ensuring consistency and quality of the training materials.
- **Module Examples:** Examples of introductory pages, lessons, assessment pages, and additional resources for each module.

Transnational Meeting in Sofia

On May 9-10, 2024, the second transnational partners' meeting took place in Sofia, Bulgaria, hosted by INTEMPORE EOOD. This meeting brought together representatives from Romania, Austria, Bulgaria, and Greece. The agenda included detailed presentations on the current status of the project, discussions about the e-learning platform, and the dissemination plan. We also covered quality assurance and risk analysis associated with the project. It was an excellent opportunity to validate our concept and plan short-term actions.

Available resources and platforms

We invite you to visit our official website inclusive-apprenticeships.eu and follow our Facebook page [Inclusive Apprenticeships Project](#) to stay updated on all the latest news and upcoming events.
